The Company is incorporated and domiciled in Canada and its registered office is located at 70 Jefferson Avenue, Toronto, Ontario, M6K 1Y4. The Company's shares are publicly traded on the TSX Venture Exchange under the symbol "ZUM".

2. BASIS OF PREPARATION

The Company prepares its consolidated financial statements in accordance with Canadian generally accepted accounting principles **("GAAP")**, defined as International Financial Reporting Standards (**"IFRS"**) as set out in Part 1 of the Handbook of the Canadian Institute of Chartered Accountants (**"CICA Handbook"**).

These unaudited interim condensed consolidated financial statements have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, including International Accounting Standard (**"IAS"**) 34, *Interim Financial Reporting*. The disclosures contained in these unaudited interim condensed consolidated financial statements do not contain all requirements of Canadian GAAP for annual consolidated financial statements and should be read in conjunction with the audited consolidated financial statements for the year ended June 30, 2013.

These interim condensed consolidated financial statements follow the same accounting policies and methods of application as the audited consolidated financial statements for the year ended June 30, 2013 except as described in Note 3 for standards adopted in the current fiscal year. The Board of Directors approved these interim condensed consolidated financial statements on May 28, 2014.

The Company intends to change its fiscal year end from June 30th to August 31st effective 2014. The purpose of the change is to align the Company's fiscal year end to the broadcast year end of its television and radio properties, which make up the most significant portion of the Company's operating activities. This change will not have an impact on these interim condensed consolidated financial statements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company has adopted the following new and revised standards, along with any consequential amendments, effective July 1, 2013. These changes were made in accordance with the applicable transitional provisions.

(a) Accounting Standards Adopted In The Current Year

IFRS 10, *Consolidated Financial Statements* (**"IFRS 10"**), requires an entity to consolidate an investee when it has power over the investee, is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces *SIC-12, Consolidation—Special Purpose Entities* and parts of *IAS 27, Consolidated and Separate Financial Statements*. The Company assessed its consolidation conclusions on July 1, 2013 and determined that it is required to consolidate JTM Classical Inc. (**"JTM Classical"**) as a structured entity effective November 6, 2012, the entity's date of incorporation. As the application of IFRS 10 is retrospective, the consolidation of JTM Classical had the impact of reducing revenue recognized for services provided to the structured entity by the Company in the fourth quarter of fiscal 2013 in the amount of $152,909, and capitalizing the associated costs as intangible assets in the amount of $122,327.

The impact of the revision as at June 30, 2013 is to decrease accounts receivable in the amount of $152,909, to increase intangible assets relating to program rights in the amount of $122,327 and to increase the deficit by the net amount of $30,582.

IFRS 11, *Joint Arrangements* (**"IFRS 11"**), requires a venturer to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under existing IFRS, entities have the choice to proportionately consolidate or equity account for interests in joint ventures. IFRS 11 supersedes IAS 31, *Interests in Joint Ventures*, and SIC-13, *Jointly Controlled Entities—Non-monetary Contributions by Venturers.* The adoption of IFRS 11 had no impact on the unaudited interim consolidated financial statements.

IFRS 12, *Disclosure of Interests in Other Entities* (**"IFRS 12"**), establishes disclosure requirements for interests in other entities, such as subsidiaries, joint arrangements, associates, and unconsolidated structured entities. The standard carries forward existing disclosures and also introduces significant additional disclosure that address the nature of, and risks associated with, an entity's interests in other entities. The adoption of IFRS 10 requires the Company to consolidate JTM Classical as a structured entity and IFRS 12 requires disclosure surrounding the significant judgment involved in arriving at the conclusion of the requirement to consolidate. IFRS 12 also requires disclosure of the nature of, and changes in, the risks associated with consolidated structured entities. Refer to Note 3 (d).

IFRS 13, *Fair Value Measurement* (**"IFRS 13"**), provides a single framework for measuring fair value. The measurement of fair value of an asset or liability is based on assumptions that market participants would use when pricing the asset or liability under current market conditions, including assumptions about risk. The Company adopted IFRS 13 on July 1, 2013 on a prospective basis. The adoption of IFRS 13 did not require any adjustments to the valuation techniques used to measure fair value and did not result in any measurement adjustments as at July 1, 2013, but requires additional disclosures to be made with respect to the input levels of the Company's financial instruments.

In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical financial assets or financial liabilities that the Company has the ability to access. The Company uses Level 1 inputs in the determination of the fair values of cash and cash equivalents, trade and other receivables, trade and other payables, and other liabilities.

Fair values determined by Level 2 inputs use inputs other than the quoted prices included in Level 1 that are observable for the financial asset or financial liability, either directly or indirectly. Level 2 inputs include quoted prices for similar financial assets or financial liabilities. The Company uses market interest rates in the valuation of its long-term debt and restricted cash and investments.

Level 3 inputs are unobservable inputs for the financial asset or financial liability, and include situations where there is little, if any, market activity for the financial asset or financial liability. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgement, and considers factors specific to the financial asset or financial liability. The Company has no financial instruments valued under Level 3 inputs on the consolidated balance sheets.

(b) Accounting Standards Issued but not Yet Applied

The IASB has issued the following standards, which have not yet been adopted by the Company. The Company has not yet begun the process of assessing the impact these new and amended standards will have on its financial statements or whether to early adopt any of the new requirements.

IFRS 9*, Financial Instruments* (**"IFRS 9"**), was issued in November 2009 and addresses classification and measurement of financial assets. It replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments. Such instruments are either recognized at fair value through profit or loss or at fair value through other comprehensive income. Where equity instruments are measured at fair value through other comprehensive income, dividends are recognized in profit or loss to the extent that they do not clearly represent a return of investment; however, other gains and losses (including impairments) associated with such instruments remain in accumulated comprehensive income indefinitely.

Requirements for financial liabilities were added to IFRS 9 in October 2010 and they largely carried forward existing requirements in *IAS 39, Financial Instruments – Recognition and Measurement*, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss are generally recorded in other comprehensive income.

IFRS 9 was amended in November 2013, to (i) include guidance on hedge accounting, (ii) allow entities to early adopt the requirement to recognize changes in fair value attributable to changes in an entity's own credit risk, from financial liabilities designated under the fair value option, in other comprehensive income (without having to adopt the remainder of IFRS 9) and (iii) remove the previous mandatory effective date of January 1, 2015, although the standard is available for early adoption.

IFRIC 21, *Levies* was issued to clarify that an entity recognizes a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. It also clarifies that a levy liability is accrued progressively only if the activity that triggers payment occurs over a period of time, in accordance with the relevant legislation. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability should be recognized before the specified minimum threshold is reached. This is effective for annual periods beginning on or after January 1, 2014 and cannot be early adopted.

Amendments to standards

IFRS 7, *Financial Instruments: Disclosures,* has been amended to enhance disclosure requirements related to offsetting of financial assets and financial liabilities. The amendment is effective on adoption of IFRS 9 which is effective for annual periods beginning on or after January 1, 2015.

IAS 32, *Financial Instruments: Presentation,* has been amended to clarify requirements for offsetting of financial assets and financial liabilities. The amendment is effective for annual periods beginning on or after January 1, 2014.

(c) Significant Accounting Judgements and Estimation Uncertainties

Critical accounting judgements and estimates

The preparation of financial statements under IFRS requires management to use judgement in applying its accounting policies and estimates and assumptions about the future. Estimates and other judgements are continuously evaluated and are based on management's historical experience and other factors, including expectations about future events that are believed to be reasonable under the circumstances. Actual results may differ materially from these estimates.

The key judgements, estimates and assumptions made in applying accounting policies which have the most significant risk of causing a material adjustment to the carrying amount of assets and liabilities are: the determination of Cash Generating Units (**"CGUs"**); the values associated with indefinite life intangible assets and goodwill; the estimated period of use of program rights; the estimated useful lives of non-financial assets with definite useful lives; and income tax liabilities including the assessment of temporary differences.

(d) Interests in structured entities

JTM Classical and JTM Holiday II Inc. ("JTM Holiday") are structured entities where the Company holds no equity interest or voting rights. JTM Holiday was incorporated on October 31, 2013. The Company concluded that it controls JTM Classical and JTM Holiday (together "the JTM entities") as the sole activities of the JTM entities is the creation of television programming content for which the Company will have exclusive Canadian rights. Additionally, the JTM entities are dependent on the Company for financial support, both in the form of program license fee payments as well as through the provision of production services, including equipment and personnel. The JTM entities also expect to receive funding from Canada Media Fund and through Federal and Provincial tax credits. To the extent such amounts are not received, the JTM entities may not have the ability to pay the Company for the provision of production services. As at March 31, 2014, cash of $79,179, deferred programming costs of $786,143 and other current liabilities of $680,388 are included in the financial statements resulting from the consolidation of the JTM entities. As at June 30, 2013, except for deferred programming costs of $122,327, all balances of JTM Classical have been eliminated on consolidation.

Goodwill and indefinite lived intangible assets, such as broadcast licenses, are tested for impairment, annually on June 30, as part of the CGU to which they belong or when circumstances indicate the carrying value of the CGU may be impaired. During the quarter ended March 31, 2014, management concluded that, based on the performance of the AM and FM Radio CGUs (together, the "Radio CGUs"), an impairment test was required on the carrying value of the broadcast licenses. The Radio CGUs did not meet their budgeted growth targets to date and accordingly, given the expected growth rates as revised by management, the Company has recorded a further impairment on its AM and FM broadcast licenses in the amount of $1,690,065.

Key assumptions used in fair value less costs of disposal calculations

	March 31, 2014 Radio	June 30, 2013 Radio
Growth rate - year 1	2.5%	3.4% - 5.6%
Growth rate - years 2 to 5	2% - 3%	2% - 3%
Discount rate	14.9% - 15.6%	14.9% - 15.6%
Long-term growth rate	2% - 3%	2% - 3%

The calculations of fair value less costs of disposal for the CGUs are most sensitive to the following assumptions:

- Growth rates
- Discount rates
- Long-term growth rates

Growth rates – Growth rates over the five-year period are a combination of management's estimate of annual growth for the next fiscal year based on historical growth rates achieved for the two or three proceeding years in combination with changes in planned business strategies, and the review of available market forecasts and data for growth rates for years two to five.

Discount rates – Discount rates represent the current market assessment of the risks specific to each CGU regarding the time value of money and individual risks of the underlying assets.

Long-term growth rates – Cash flows beyond the five-year period are based largely on management's estimate of the ability of the CGU to grow in a mature market.

Sensitivity to changes in assumptions

The determination of fair value less costs of disposal is sensitive to the growth rate, discount rate and long-term growth rates used. The risk premiums expected by market participants related to uncertainties about the industry and assumptions relating to future cash flow may differ, depending on economic conditions and other events. Accordingly, it is reasonably possible that future changes in assumptions may negatively impact future assessments of the recoverable amount for the Radio CGUs and the Company would be required to recognize a further impairment loss.

In the event that the third party does not fulfill its obligations, the Company will be liable for the remaining payments due under the lease. The Company's continuing obligation under the lease is secured by a general security agreement covering the assets of the Company excluding the property located at 64 Jefferson Avenue and the assets of the Radio business segment. At March 31, 2014, the remaining future minimum payments due under the lease are $2,827,283. The lease expires in April 2021.

Since the time of acquisition, the Company has been in dispute with the former owners on the working capital but subsequent to March 31, 2014 has agreed upon a settlement. Refer to Notes 9(i) and 19.

18. SEGMENTED INFORMATION

Management has determined that during the year the Company operated within five reportable business segments: Television, Radio, Print, Royalty and Other operations. These business segments reflect the management structure of the Company and the way in which management reviews business performance. The Company evaluates the performance of its operating segments primarily based on segment income (loss), as presented below.

The Radio segment consists of the Company's three radio stations and generates revenues primarily from the sale of advertising. The Print segment publishes Zoomer Magazine and generates revenue from advertising, subscriptions and sundry sources. The Royalty segment provides exclusive membership and marketing services to CARP and earns revenue from royalties.

Other activities include the operation of a number Canadian websites and the production of ZoomerShows, and other trade and consumer shows directed to the 45plus age group. Other activities generate revenue from advertising, sponsorship, booth rentals and ticket sales.

Corporate results primarily represent the incremental cost of corporate overhead in excess of the amount allocated to the segments. During the three and nine months ended March 31, 2014 and 2013, Corporate results also includes revenue earned from the rental of the Company's commercial property located in Toronto and the associated expenses.
